IMPORTANT MEMORANDUM

TO: All Parents and NHCCS Staff

FROM: Rhonda E. Wilson, Chief School Administrator 

CC: NHCCS Board of Trustees
Tom Omwega, School Business Administrator

DATE: September 4, 2019

SUBJECT: Test Results of the School's Water Supply

As a follow-up to a previous communication sent to all parents and guardians about the on-going issue with high levels of lead in the city of Newark's water supply, we have received the preliminary test results of our school.

I am pleased to announce that Whitman Environmental Services determined that all water samples are below the "action level". This means that our students can drink from the various water fountains throughout our school. The one single issue cited was a sink in the girls' bathroom which requires additional testing. This is **NOT alarming because this particular sink used for hand washing hands in a restroom. However, a sign was placed over the sink indicating that the water is **NOT to be used for drinking**.**

Once again, water consumed from all fountains at the New Horizons Community Charter School is **SAFE to drink**. The only water issue cited in the environmental report is the water from a sink in the restroom on the first floor. There is a sign indicating that the water is **NOT safe for drinking until the issue is resolved**. We do not drink from sinks in the school.

Should you have any questions regarding this communication, please do not hesitate to contact the school.

Regards
